TRACT 24-22 – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Bayfield County Timber Sale Contract.

A. PRESCRIPTION:

1. Unit 1 has a coppice prescription with spruce, American elm, and white birch reserves with an estimated average residual basal area of 11 sq ft.
2. Unit 2 has a thinning prescription with sugar maple and basswood reserves with an estimated average residual basal area of 72 sq ft.

B. HARVEST REQUIREMENTS:

1. Unit 1, harvest all stems 2 inches and greater except for American elm, white birch, and oak. Leave all conifers. The western portion of this unit has scattered rock outcrops with operable flat areas in-between the rock outcrops. **Leave trees** on the rock outcroppings even if they can be accessed with some ingenuity and harvest flat areas in-between (see map for rock outcropping area).
2. Unit 2, harvest all ash stems 2 inches and greater, leave all other trees.

C. HARVEST AND OPERATIONAL REQUIREMENTS AND SEASONAL RESTRICTIONS:

1. Frozen harvest operations only for both units (as determined by the county).
2. Utilization specification is to a 4" top. However, if the County determines that pulpwood markets continue to be very poor at the time of harvest the County will sign a contract amendment with the purchaser changing the utilization specification to a 5" top for the selected species. When determining condition of the market, the County will pay particular attention to the amount of wood being purchased by the mills in Wisconsin Rapids and any other significant shifts in the wood demand.
3. Sale boundaries include red paint line, the primary haul road and stark transitions into less than 5-year-old south of both units.
4. If harvest will utilize the whole tree, 1 in 10 tops must be left scattered throughout the sale.
5. Do not damage any survey monumentation.

D. ACCESS AND ROADS:

1. A temporary bridge has already been installed by the county.
2. Upon sale closeout contractor is to remove the temporary bridge. Non-frozen conditions will be required to allow for the rehabilitation of the stream bank. An excavator that can lift the mats from one side of the stream and rehabilitate from the opposite bank is required. Once the bridge has been removed and crossing area restored as determined by and to the satisfaction of the county the contractor will need to move the mats to a location in Iron River designated by the County upon competition.
3. A rock berm exists approximately 100 ft west into the haul road from highway 27. This rock berm is to be restored open sale close to the satisfaction of the sale administrator.
4. This contract requires County authorization for all road/landing construction and places a number other requirements on road construction and closure.
5. Decking of wood along state highway 27 will not be allowed without permission from Bayfield County.
6. As per the Bayfield County Access Management Plan, the existing roads within this timber sale are closed to some or all forms of motorized vehicle use. Prior to the completion of the timber sale, roads that were used to access the sale will need to be closed, as determined by, and to the satisfaction of, Bayfield County.

E. OTHER:

1. **THIS SALE WILL BE SOLD AS A 3-YEAR CONTRACT. Contract extensions are not guaranteed.**
2. To comply with Best Management Practices for Invasive Species: Prior to moving equipment onto or off the sale area, scrape or brush soil and debris from exterior surfaces to the extent practical.
3. Do not damage any survey monumentation.
